Odesys offers the following Modules

Odesys trains your professionals based on **your System or Problem of Interest** (SOI or POI). This means that the various modules below are directly linked to these SOI/POI learning vehicles, which are defined by your organization. We leverage the proven **Open Design Learning concept** (ODLc) to guide this process. Depending on your type of problem and field of application, we offer the following different modules:

MODULE 1 – Systems Design & Management

Introduction to Odesys (Decision science – Design systems – Management problems)

MODULE 2 – Systems Engineering Design

Introduction to Odesys (Generative/Parametric Design – Infra/ Building problems)

MODULE 3 – Engineering Project Management

Introduction to Odesys (Dynamic Project Delivery Planning – Infra/ Building projects management)

MODULE 3 – Engineering Asset Management

Introduction to Odesys (Dynamic Service Operations Planning – Infra/ Building assets management)
